----------------	----------	----------------------------	-----

Introduction

In the past, Noritz's focus has been on creating a comfortable life through providing hot water. While this focus will continue, we must take "comfort" to a new level through consideration of the global environment. Today, "comfort" encompasses the realization of an economically as well as environmentally sound society in which there is an efficient and effective use of limited fossil fuels and recyclable energies.

Our CSR policy aims to (1) pursue the creation of economic value to support financial business strategy, (2) pursue the achievement of social causes to support the needs and hopes of our society, and (3) pursue the advancement of Noritz way.

In December 2012, Noritz Corporation signed off on the ten principles of the United Nations "Global Compact." The four fields and ten principles of the Global Compact promote activities based on corporate philosophy and the building of a global framework in order to achieve sustainable growth for both our society and our company.

We recognize the volatility and changes in the global supply chain environment, especially in recent years. As we keep abreast of the changes, our procurement activities must effectively support the social responsibility of our company.

Accordingly, with the publication of the "Noritz CSR Report," we have formed the "Noritz Group CSR Procurement Guidelines" as a guideline for CSR activities.

Please refer to these guidelines and further promote our CSR procurement activities to benefit all our customers.

<Our approach and our requests for our customers>

1. Respect for human rights

We act with the self-awareness of having the utmost respect for the human rights of all people.

1) Respect for human rights

In every aspect of our business activities, we place the highest priority on respecting and protecting the human rights of all members inside and outside of our company.

Furthermore, we do not discriminate or violate human rights on the basis of race, nationality, gender, etc.

2) Prohibition of sexual harassment and other forms of harassments, including bullying

We will work to ensure the maintenance of a harassment-free workplace, in which employees treat each other with mutual respect.

Our supplier partners perform corporate activities in a way that ensure they respect all people and do not violate human rights.

2. Improving the satisfaction of our customers

In order to ensure reliability, we make sure that the products we create support the lifestyles of our customers and promote an approach that improves design quality, production quality, operation quality, and CS-response quality.

1) Ensuring product safety and quality

In order to deliver safe and high quality products, mainly in the design and production stages, and improve quality, we are promoting activities on a daily basis to use various standards, indexes, and control methods.

2) Approach to customers

We actively respond to the customer comments that are received daily by our contact center; based on those customer comments, we improve products and services, prevent defects in advance, improve quality, and address safety issues.

Our supplier partners establish a quality assurance structure in order to satisfy our requested quality review, and maintain a parts provision structure to enable their stable supply.

3. Corporate activities based on the compliance with laws, regulations, and corporate ethics

We shall observe all related laws in each country and region, and conduct all corporate activities based on respect for social morals and with sound judgment.
